A white wall-mounted air conditioner is positioned in the upper left corner of the room. It is connected to a power outlet on the wall to its right, with a black power cord running down the wall.

The room contains several levels of dark metal shelving units. The top shelf holds two large, plain brown cardboard boxes. The second shelf from the top is filled with various boxes, including several boxes labeled "CARETEX" in red and white, and others labeled "PRC-5" in blue and white. The third shelf contains stacks of white boxes, a large white plastic bottle, and other smaller boxes. The bottom shelf is mostly occupied by large brown cardboard boxes, some of which have "UP LTD." printed on them. The floor in front of the shelves is also cluttered with more cardboard boxes.

A light-colored desk is located in the lower right corner of the room. On the desk, there is a black computer monitor, a black keyboard, and a black mouse. The desk is positioned against the wall, which has a power outlet and a light switch nearby.

A white door is visible on the right side of the image. Above the door frame, there is a small circular sign with the number "31" inside. The door has a handle and a lock mechanism.
