**Date: 23/01/2022
Time: 02:00 PM**

The daily COVID-19 bulletin of the Department of Health and Family Welfare, Government of Kerala summarizes the COVID-19 situation in Kerala. The bulletin also contains links to various important documents, guidelines, and websites for references.

OUR HEALTH OUR RESPONSIBILITY

- *Even after vaccination , follow COVID appropriate behaviour.*
- *Maintain a distance of at least two metres with all people all the time.*
- *Always wear clean face mask appropriately everywhere all the time*
- *Perform hand hygiene after touching objects and surfaces all the time.*
- *Perform hand hygiene before and after touching your face.*
- *Observe cough and sneeze hygiene*
- *Avoid unnecessary travel, social interaction*
- *Protect the elderly and the vulnerable- Observe reverse quarantine*
- **PEOPLE WITH MULTIPLE COMORBIDITIES , IF DETECTED COVID POSTIVE SHOULD GET ADMITTED IN THE HOSPITAL IMMEDIATELY AND DO NOT REMAINED IN HOME ISOLATION**
- *Infection prevention by following Covid appropriate behaviour got strengthened with introduction of COVID vaccination.*

Covid 19 status- Analytical Note

- 100% of the eligible population vaccinated with a single dose of vaccine (2,67,53,867) and 83% with a double dose (2,22,68,609) till January 23.
- 66% of population among 15-17 age group vaccinated with single dose of vaccine (10,07,879)
- Kerala is the state with highest rate of Vaccination/ Million- 1411712. The state has vaccinated more than 97% of people aged more than 45 years with a single dose and 84% with double dose*. (*Target recalculated)
- People have been cooperating we appeal to the 2nd dose eligible people to take their second dose of Covishield/ Covaxin without delay. Both the vaccines are effective.

- All vaccinated people should follow covid appropriate behaviour.
- **Non vaccinated people with co morbidity have higher chances of mortality based on the mortality analysis. Hence, especially people with comorbidities should be careful. All must follow Covid appropriate behaviors.**
- **COVID-19 vaccines protect people from getting infected and become severely ill, and significantly reduce the likelihood of hospitalization and death.**
- **During January 16 – January 22, the average active cases were 1,72,290 out of them an average of around 0.6% only were admitted in oxygen beds and 0.5% were in ICU. During this period there was an increase of around 1,55,536 new cases. The growth rate in newly declared cases increased by 191% during the same week compared to the previous week. The number of active patients, number of those admitted in hospitals, field hospitals, ICU, ventilator and in oxygen supported beds has increased by 199%, 91%,118%, 58%, 26% and 101% respectively in this week compared to previous week.** For any disease control program, active case finding is important. The state is doing appropriate testing. However, there is an apprehension regarding test positivity rate. It is hereby explained that test positivity rate indicates the infection. There are two specific issues all may understand i.e. **contracting infection** and because of contracting infection **the disease manifestation**. The World over post vaccination phase, contracting infection to disease manifestation is examined as **CONVERSION RATE** to decide the severity of pandemic. The data as on date suggests the conversion rate is stable because the People are following instructions, taking vaccines. However, it can be further improved with cooperation from all i.e. positive person having comorbidities should not delay their arrival in Hospital and take treatment as per the treatment protocols.
- Out of total 2,64,638 cases of infection only 3.5% of the active cases are admitted either in hospital/Field hospitals.[Non-KASP hospital occupancy too included]. This percentage is more or less constant and that indicates that the progression toward disease of the person who is infected is not very alarming and appropriate care and support is being given to patients. The patients who arrive late in the hospital even though having morbidity are the majority patients in the hospitals and Diabetes and Hypertension together being the most common cause of patient death. Therefore, we request people with co morbidities once detected with covid infection to get hospitalized in time.
- Based on the Covid positive data during June, July and August, 6% of the Covid positive patients had taken a single dose of Covid 19 vaccination and 3.6% had taken two doses of covid 19 vaccination. This indicates that vaccinated people may get infected, even though it is very less. It indicates that post vaccination immunity is effective in preventing infection. Vaccinated people are advised to consult Doctor only when symptomatic. Vaccinated people should follow covid appropriate behaviour.
- Symptomatic non-Vaccinated people may do RTPCR test. Antigen testing is only for emergency purpose. Non vaccinated people with co-morbidities to do testing by RTPCR and consult doctor.
- Repeat RTPCR is not needed among the people who are detected COVID positive in the previous 3 months. All young person detected positive and at home isolation should do blood sugar test.

PART- 1 SUMMARY OF COVID CASES AND DEATH

Table 1. Summary of COVID-19 cases till 22/1/2022

| Positive cases | Recovered patients | New persons in Quarantine/ Isolation | New Persons in Home, Institution quarantine | New persons in Hospital Isolation | Total no of Deaths reported | No of deaths declared as per appeal G.O.(Rt) No.2110/2021/H&FWD (B) |
|----------------|--------------------|--------------------------------------|---|-----------------------------------|-----------------------------|---|
| 5597648 | 5297971 | 57220 | 56096 | 1124 | 51739 | 16919 |

Table 2. Summary of new COVID-19 cases (last 24 hours)

| Positive cases | Recovered patients | New persons in Quarantine/ Isolation | New Persons in Home, Institution quarantine | New persons in Hospital Isolation | No of Deaths declared daily (A) | No of deaths declared as per appeal G.O.(Rt) No.2110/2021/H&FWD (B) |
|----------------|--------------------|--------------------------------------|---|-----------------------------------|---------------------------------|---|
| 45449 | 27961 | 63065 | 61967 | 1098 | 38 | 39 |

Table 3. Cumulative summary as on 23/01/2022

| Total Positive cases | Active cases | Total Recovered | Total persons in Quarantine/ Isolation | Persons in Home/Institution quarantine | Persons in Hospital Isolation | Total No of Deaths (D) | Total No of deaths declared as per appeal G.O.(Rt) No.2110/2021/H&FWD (E) |
|----------------------|--------------|-----------------|--|--|-------------------------------|------------------------|---|
| 5643097 | 264638 | 5325932 | 417764 | 408881 | 8883 | 51816 | 16958 |

Table 4. District wise summary of Cumulative cases, Active cases, and New positive cases

| District | Positive Cases declared today | Declared Negative today | Positive cases admitted in the district |
|--------------------|--------------------------------------|--------------------------------|--|
| Thiruvananthapuram | 8980 | 9017 | 57486 |
| Kollam | 2667 | 577 | 14501 |
| Pathanamthitta | 1723 | 1146 | 9584 |

PART-III SURVEILLANCE

Table 12. District wise distribution of persons under quarantine and isolation

| District | Persons under observation as on today | Persons under home/institutional quarantine as on today | Total persons under hospital Isolation as on today | Persons hospitalized today |
|--------------------|---------------------------------------|---|--|----------------------------|
| Thiruvananthapuram | 103025 | 101257 | 1768 | 283 |
| Kollam | 29042 | 28526 | 516 | 75 |
| Pathanamthitta | 14604 | 13950 | 654 | 40 |
| Alappuzha | 22282 | 22014 | 268 | 37 |
| Kottayam | 32769 | 32003 | 766 | 0 |
| Idukki | 10571 | 10491 | 80 | 9 |
| Ernakulam | 56642 | 54970 | 1672 | 119 |
| Thrissur | 30064 | 29320 | 744 | 155 |
| Palakkad | 18665 | 18283 | 382 | 57 |
| Malappuram | 23680 | 23321 | 359 | 58 |
| Kozhikode | 29482 | 28670 | 812 | 93 |
| Wayanad | 16678 | 16472 | 206 | 56 |
| Kannur | 18324 | 17993 | 331 | 103 |
| Kasaragod | 11936 | 11611 | 325 | 13 |
| Total | 417764 | 408881 | 8883 | 1098 |

Table 13. Summary of Travel surveillance 23/01/2022

| Mode of Travel | Cumulative number of Passengers |
|-----------------------|---------------------------------|
| International airport | 2979385 |
| Total | 2979385 |

PART-IV PSYCHOSOCIAL SUPPORT

'**Ottakalla Oppamundu**' is a program for providing Psychosocial support to the people in quarantine, isolation, school children and other categories of population as well as to the community in general. **867** Mental Health Personnel including Psychiatrists, Psychiatric Social Workers, Clinical Psychologists, and Counsellors are working and have given psychosocial support.

Table.14. Psychosocial support provided through the program "Ottakalla Oppamundu"

| | |
|--|--------------------|
| No. of Psychosocial workers | 867 |
| Total Psychosocial support calls made to persons in quarantine/ isolation. | 75,16,958 |
| Total psychosocial support follow-up calls made | 32,12,102 |
| Total Post COVID calls | 11,33,087 |
| Total calls made to persons under treatment for mental illnesses, migrant labourers, differently abled children, elderly persons staying alone | 3,48,860 |
| Total Psychosocial support calls to school children | 9,98,805 |
| Total psychosocial support calls to health care workers | 64,194 |
| Total Psychosocial support calls received in helpline numbers | 92,372 |
| Total calls to all categories of Persons | 1,33,66,378 |
